WORK EXPERIENCE

Tech Consultant & Lead NFC Engineer OneX

02/2023 - Present

Remote

(Retainer - on project contract basis - 10-15 hours a month)

Achievements/Tasks

- **NFC System Design:** Designed and implemented NFC card layouts and configurations, aligning with technical and project requirements.
- **Team and Stakeholder Collaboration:** Managed a team of developers, ensuring high-quality deliverables, while coordinating with stakeholders to align project objectives and technical solutions.
- **Set up CI/CD with GitHub Actions + Fastlane,** automated Play-listing & Firebase Test Lab runs, pushing > 90 % unit/instrumentation coverage on core modules.
- **Collaborated with backend (Kotlin-Ktor) and product** to launch prescription-scan, in-app chat with pharmacists, and GDPR-compliant analytics using Firebase & BigQuery.
- **Engaged in 30+ calls** with potential early adopters and investors, building a robust pipeline for the CEO's presentations and pitches.

Contact : Shuja Ahmed - shuja.ahmed@onexstudio.me

Lead Software Engineer - Support Team Cooptalis/Anywr Group

08/2022 - 06/2024

Lille - France

Achievements/Tasks

- Monitored **20+ production services** and hardened Android CI pipelines, cutting build times 30 % and reducing release rollbacks to zero.
- Deployed in-house **LLM bot** that reviews pull-requests; slashed manual review load 25 % and improved static-analysis scores.
- Introduced **OAuth2 / JWT** flows to the mobile gateway, passing external pen-tests with zero major findings.
- Ran Android guild sessions and brown-bags for 40 engineers (backend & mobile) to standardise Kotlin style-guide and DI patterns.

Contact : Youssef Jradeh - youssef.jradeh@anywr-group.com

Lead Android Engineer / Mobile Lead IdeaToLife

02/2017 - 08/2022

Remote

Achievements/Tasks

- **Owned the #1 Pharmacy App in Qatar** – rebuilt the entire Android stack in *Kotlin + Jetpack Compose*, scaling to **500 000 installs** and **30 000+ monthly active users** while keeping crash-free sessions > 99 %.
- Introduced **Clean Architecture (MVVM + modular layers)** and a reusable SDK that cut feature lead-time **40 %** across six client apps.
- **Mentored 5 Android & Flutter juniors**, driving code-review culture that lifted release frequency from fortnightly to weekly.
- Led discovery workshops with design & sales to align UX flows with e-commerce KPIs, raising pharmacy-app checkout conversion **15 %**.

TECHNICAL SKILLS

Core

Kotlin (6 yrs), Java (8 yrs), Jetpack Compose, XML layouts, Android SDK 21-35, AndroidX, App Bundles, Play Console ops, Swift, Dart, JavaScript

Architecture & DI

MVVM, Clean & Hexagonal Architecture, Modularisation, Hilt / Dagger, KMM, Coroutine/Flow, Room, WorkManager

Testing & CI/CD

JUnit5, Espresso, MockK, Robolectric, Firebase Test Lab, GitHub Actions, GitLab CI, Fastlane, SonarQube, Crashlytics

Tooling & Analytics

Android Studio Electric Eel/ Iguana, Lint, GradleKTS, ProGuard/R8, Firebase Analytics, Performance Monitoring, DataDog

Cloud & Backend Touchpoints

REST / GraphQL, Retrofit, OkHttp, Ktor, gRPC, AWS (S3, Cognito), GCP (Firebase), Push (FCM & APNs)

Cross-Platform & Other

Flutter (Dart), Swift UI (Advanced), React Native, NFC (Famoco + Calypso), Git, Docker, Kubernetes basics

Soft / Process

Agile Scrum & Kanban, TDD, Domain-Driven Design, Mentorship, Stakeholder Workshops, Public Speaking (Toastmasters)

TOP PROJECTS

Kulud - Pharmacy App - Qatar (02/2021 - 08/2024)

- **Lead Android Engineer** – Migrated legacy Java app to Kotlin + Compose; integrated in-app prescription scan, secure Stripe payments, multilingual push; grew to **500k installs / 30k MAU** with 98 % crash-free rate.

Dakar Dem Dikk - Senegal Public Transport system (02/2023 - 06/2024)

- Integrated Calypso NFC technology with Famoco devices on Android, designing NFC layouts and ensuring seamless hardware-software performance for reliable operations.

WHO - E-Cap Surveillance App (10/2019 - 04/2020)

- An app designed for WHO team in Iraq to survey health cases. App consisted of complex data structures that had to adhere to dynamic types of questionnaires.
